Co-funded by European Union

Coloreel's unique and revolutionary thread colouring technology has already made huge impression on the textile industry. Now the Swedish innovation company has got a multi-million grant from the EU Framework program for research an innovation, Horizon 2020.

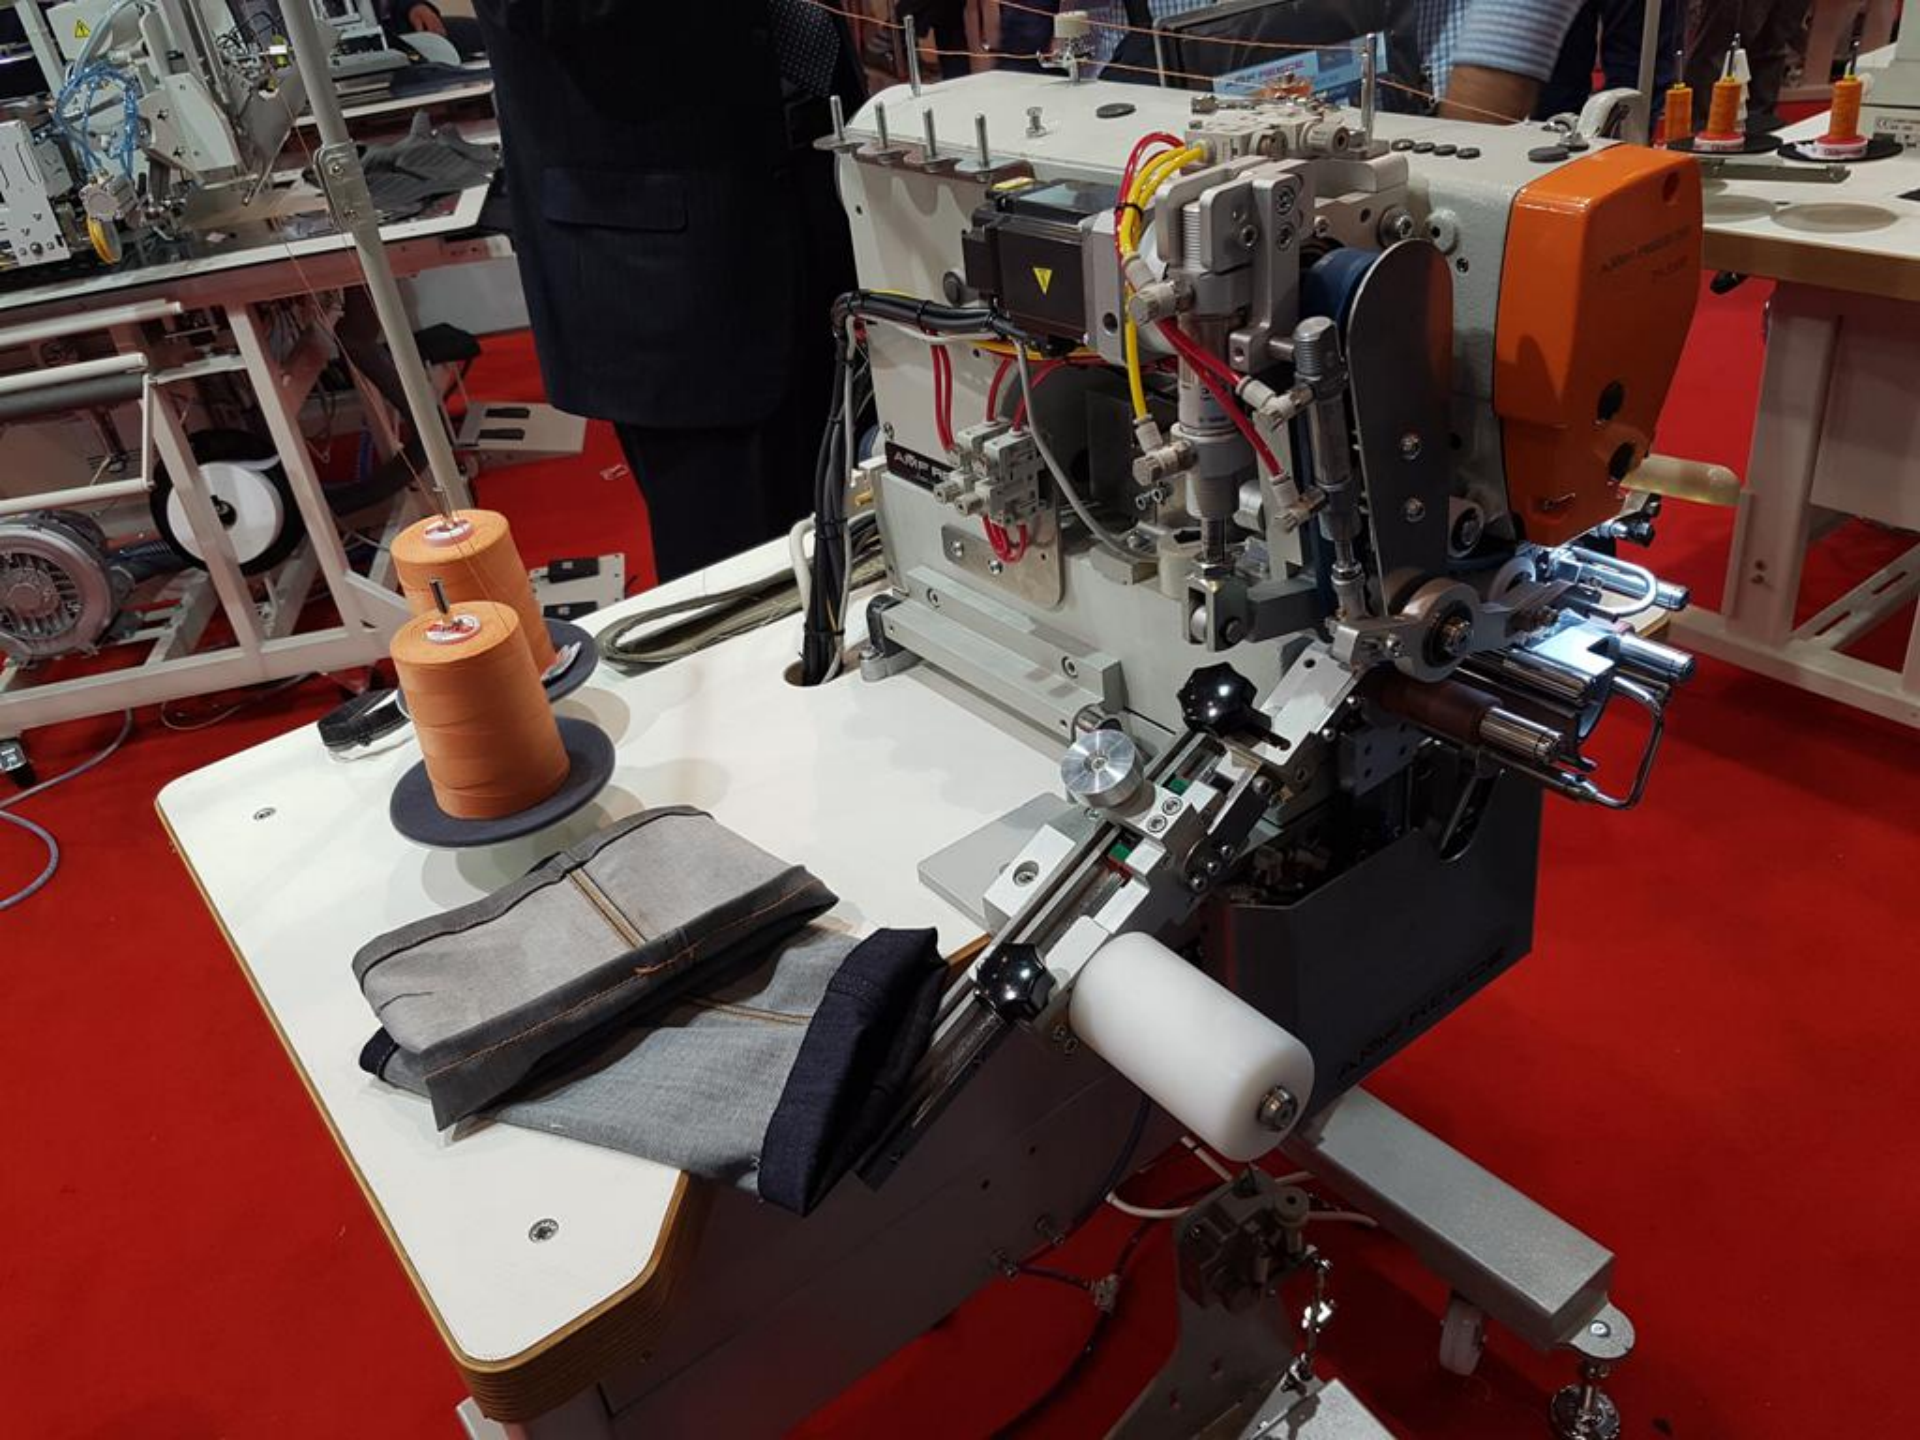

"With this funding and the potent support of the European Commission we will be able to further strengthen our IP portfolio and secure our mission to provide the textile market with groundbreaking thread colouring solutions"

Jockim Stoberg, founder of Coloreel and inventor of the technology
